Re: New Price Notification Effective June 1

We have worked hard to control what we can at Dixon to limit the impact of price increases. However, external forces continue to apply pressure in the form of material costs, freight, and other inflationary factors. We are committed to limiting price increases to a minimum, understanding the hardship it places on our customers. Despite our best effort, we need to take action.

Effective June 1, Dixon will implement a price increase. The precise amount of increase varies by product and material. In some cases, significant increases were taken by Dixon on some of our products or materials, and we are compelled to pass those on. The total blended increase is around 8%. Your price file is attached.

Thank you for your business. We appreciate it!

Sincerely,
Dixon
