Re: Ductile Iron Price Increase Effective October 11<sup>th</sup> 2021

Dear Steve:

When we made our calculations for our July price increase we excluded carbon steel, ductile iron and cast iron products with the hope that pricing for this material would hold steady. Unfortunately this has not proven to be the case. The escalating price of these materials along with added logistical costs are forcing us to revise these products as well.

When it comes to the items that you currently purchase only groove checks, male x female checks and wafer check valves will be affected. The rate of increase is 6%. An updated price list detailing these changes is attached.

All orders that are placed and scheduled to ship on or before 10/8/21 will be invoiced at current prices. Any items that may be on backorder as of 10/8/21 will also be invoiced at current prices.

Should you have any questions, please feel free to contact me at 800/334-3035 ext. 236.

Thank you,

Jim Sattler
